1 General

This folder contains the experimental material used for building up the experiment on manner/path differences across Dutch and French. The excel file *items identification* contains all the information regarding the movies, their ID number, and the pseudo verb used to match them.

1.1 Folders

1.1.1 *Ambiguous videos*

This folder contains the 16 ambiguous videos used in the experiment: 8 are the experimental items and display a manner/path ambiguity, 8 are filler items and display a instrument/action ambiguity.

1.1.2 *Areas of interest (AOI)*

This folder contains the 8 screen shots of the AOI that have been chosen for the analysis of the manner/path gaze allocation of the experimental items.

1.1.3 *Choice LR and Choice still LR*

These folders contain the disambiguating videos used for the choice test and the stills of the final frame of the same videos. This set of 16 videos display the manner/path; instrument/action ambiguity in a *left right* disposition; e.g. the video display the same manner of the ambiguous video on the left end side and the same path on the right end side.

1.1.4 *Choice RL and Choice still RL*

As for the previous folder this one contains the disambiguating videos used for the choice test and the stills of the final frame of the same videos. Yet, in this case the disposition of the manner/path; instrument/action is inverted; e.g. the matching manner of action of the ambiguous video is displayed in the right end side and the matching path action is displayed on the left end side.

1.1.5 *Data*

Contains all the raw untransformed data from all the participants obtained so far.

1.1.6 *Verbs, stories and questions*

This folder contains the remaining material that was used to build every trial of the experiment. For each one of the french/dutch pseudo verbs there is a matching story and question. NB verbs need to be uploaded still.
